April 30 - May 2 2019
Dear 2019 AEC BuildTech Exhibitor,

Thank you for choosing to exhibit in the inaugural AEC BuildTech Conference & Expo taking place on April 30 – May 2, 2019 at the Donald E. Stephens Convention Center in Rosemont, IL. You have made a wise and valuable investment with your marketing dollars. We look forward to earning your trust and respect as you move through the process of exhibiting at this year’s show.

We are excited to host AEC BuildTech in Rosemont at the Donald E. Stephens Convention Center. The venue team and the official show contractors which are listed on the following pages of this exhibitor services manual have one goal in mind – to ensure that you have a positive and rewarding tradeshow experience at AEC BuildTech 2019.

Please take the time to carefully read the entire contents of this exhibitor services manual. It has been designed to assist you in the exhibit ordering process and provide all the necessary information and schedules for a successful exhibition. All of the order forms for exhibiting services including equipment rental, booth furnishings, shipping information as well as important deadline dates for obtaining significant discounts are contained in this manual.

Don’t forget that your exhibit space fees include all onsite drayage costs – but only if you ship direct to the convention center (not in advance to the warehouse). This should be a significant cost savings to your company.

Also, if hotel reservations are necessary please make your reservations directly through our official housing vendor, OnPeak. They can be reached via the event website - www.aecbuildtech.com/travel. OnPeak is the only official housing company associated with AEC BuildTech Conference & Expo. While other hotel resellers and fraudulent housing firms may contact you offering housing for your trip, they are not endorsed by or affiliated with AEC BuildTech. We have arranged for a block of specially discounted hotel rooms for AEC BuildTech participants. Visit the website now to make your reservations before this block of discounted hotel rooms sells out.

We are committed to making our first ever AEC BuildTech Conference & Expo successful for all participants and we want to do everything we can to make sure you find this event to be a valuable use of your time and resources. If you have any questions regarding this exhibitor services manual or any part of your exhibiting experience please don’t hesitate to contact anyone from the show management team (www.aecbuildtech.com/contact-us).

We look forward to seeing you in Rosemont this Spring!

Moss is the world's largest tension fabric manufacturer - we invented the technology and were the first to bring tension fabric to trade shows and retail stores. Tension fabric is fabric (printed or unprinted) stretched over an aluminum framework to create an organic or rectilinear shape.

There are several other creative Moss products available through RES. Note that there is a three week turn-around time on all Moss products.

All hanging banners and signs are subject to Show Management rules and regulations.

For more information, contact Chris Sowa at csowa@rosemontexpo.com or (847) 993-4819.
CUSTOM BOOTH GRAPHICS

**ELECTRIC SERVICE FOR EXHIBITS AT THE DONALD E. STEPHENS CONVENTION CENTER**

Electrical requirements for an exhibit at the Convention Center are based on codes developed by local and national organizations whose professional responsibility is for the safety of all exhibitors and visitors.

Too frequently, fires have been traceable to faulty wiring sometimes because of carelessness and sometimes because of lack of understanding of the risks involved.

In the interest of public safety, every exhibit presented in the Convention Center is carefully inspected to determine if violations exist. If they do, qualified electricians are available to correct the problem. This work will be performed on a time-and-material basis. If the exhibitor does not wish to have the fault corrected, electrical service will not be connected.

If an exhibitor is not informed or does not understand basic safety standards for electrical wiring, an electrician should be consulted before shipment is made to the Convention Center.

**SAFE WIRING IS ESSENTIAL**

Donald E. Stephens Convention Center is responsible for the total electrical distribution systems and the linking of all electrical items in an exhibit with the power services of the building.

Serious risks are involved which can be reduced with accurate understanding of basic requirements. Safe wiring inside an exhibit is essential.

Wiring that touches the floor must be "SO" cord which is insulated to qualify for "extra hard usage." Cord wiring above the floor level can be "SJ" which is rated for "hard usage."

All flexible cords shall be 3-wire unless the cord is a component part of an assembly which is specifically approved.

The use of open clip sign sockets, latex or lamp cord wire in displays, duplex or triplex attachment plugs are prohibited by order of the Rosemont Fire Department and Electrical Inspection Department.

All electrical equipment and wiring requires evidence of testing and approval by a nationally recognized testing laboratory.

Spot or flood lighting is a hazard when lamps are too close to fabrics or other material which may be affected by heat.

The Convention Center electrical services offer extension cords, spiders and plug molds which provide safety approved multiple plug in capacity.

State of Illinois legislative changes have modified work rule jurisdictions and wage scale schedules in the Chicagoland area. There are seven major unions that have some jurisdiction in the Chicagoland area. The following guidelines will help you in preparing your exhibit to understand these jurisdictions.

**WHAT AN EXHIBITOR CAN DO WITHOUT UNIONS IN THE CHICAGOLAND AREA**

Chicagoland work-rules modifications now enable exhibitors to perform several set-up tasks which in the past were under union jurisdiction. Each of these are itemized below, and must be completed by full-time employees of the exhibiting company.

1) Exhibitors may set up and dismantle their own booth displays, as well as the various tasks outlined below, provided the work is being done by fulltime employees of the exhibiting company. No outside workers are permitted to provide set-up and dismantle services unless they are members of a Chicagoland Carpenter Union Local with valid trade show jurisdictions.

2) Exhibitors may use hand tools and power tools to perform work within their booths.

3) Exhibitors may affix clamp-on lights to the top of their booth displays.

4) Exhibitors may calibrate and do repair work on internal circuit boards, and do interconnecting of peripheral computer equipment.

5) Exhibitors may do the connection of lighting, video equipment and light bulbs to an electrical outlet when the outlet has been ordered by the exhibitor.

6) Exhibitors may hang pictures, graphics, logos, etc. onto a backwall display when such items are designed to be affixed by pre-set velcro strips, permanently mounted hooks, or snaps.

7) Exhibitors may hand carry small packages, pop-up displays and desktop computer equipment provided it can be done without the use of a fork-lift, flatcart or dollie, only from a designated parking area.

8) Exhibitors may inflate balloons.

9) Video taping may be done by exhibitors within the confines of their own booths using equipment owned or rented by the exhibiting company, provided such taping does not conflict with show management regulations, and does not require tools or ladders.

10) Exhibitors may un-pack, re-pack and set out their own product line within the booth for display purposes.

**CARPENTERS UNION**

Carpenters handle the erection and dismantling of display and exhibit booths. This includes all display work with the exception of machinery, signs or lighted headers, unless the sign or header is a permanently attached part of the display. Carpenters also recreate machines for outbound loading. Millwrights, a division of the carpenters union, handle the assembly and the leveling of machinery, as well as the attachment of all guards and shields.

**DECORATORS UNION**

Decorators handle the installation of signs, drape background, table skirting, and all other items of decorative nature that must be done after a display background is erected.

**ELECTRICAL UNION**

Electricians handle all electrical work, which includes supplying power lines to your booth, connecting equipment to the proper outlets, installing any signs or headers that are lighted, unless they are permanently attached to the exhibit backwall, and the running of cable within the exhibitors booth.

**MACHINERY MOVERS & RIGGERS UNION**

Riggers handle all machinery. This includes the unloading of the machines from the trucks, moving the materials to your booth, and a one-time spotting of display ready equipment, which the exhibitor must supervise at the time of unloading. Riggers also remove skids and reskid machines, uncrate machines, and respot machines in the booth if needed. This service must be ordered as needed, at exhibitor's expense.

**PLUMBERS UNION**

Plumbers handle all plumbing work such as compressed air, water/drain, or natural gas.

**TEAMSTERS UNION**

Teamsters handle all freight inside the exhibit hall. They unload all trucks or vehicles, deliver the materials to your booth, and remove and reload materials at the close of the show.

**THEATRICAL STAGEHANDS UNION**

Stagehands assemble portable lighting and sound systems as well as picture screens 10’ x 14’ in size and larger. They also set stages, operate lighting and sound consoles, and hang lighting trusts and speaker systems.
Hanging of signs from the ceiling, both electrical and non-electrical, is permitted at the Donald E. Stephens Convention Center provided doing so complies with show management rules and regulations and that the following conditions and limitations are adhered to. These conditions have been reviewed and provide limits which cannot be exceeded.

1) The top of a sign may not exceed the height limitation specific to the booth location and show regulations.

2) All Hanging signs must be sent to RES warehouse, using the hanging sign shipping label included in this exhibitor service manual by the specified deadline date.

3) The total weight limit of the sign or materials is not to exceed 1500 lbs. unless approved by RES and the Donald E. Stephens Convention Center.

4) All signs, regardless of size, should be constructed of lightweight metals and plastic to allow greater flexibility and ease of installation.

5) The Final placement of all hanging signs shall be determined by RES prior to installation to insure minimum stress to the supporting framework.

6) No signs are to be hung from any electrical fixtures, raceways, gas, air, fire protection piping, supports or hangers.

7) All electrical and neon signs must conform to electrical codes of the Village of Rosemont.

8) RES Decorators are responsible for all hanging signs. RES will pre-assemble and hang all signs. No carpenter labor through a display house will be allowed to assemble any hanging sign.

9) Set-up instructions must be included with the Hanging Sign Order Form and with the sign crates.

10) Because of the structure of the ceiling and the location of exhibits in relation to support beams, the hanging sign may have to be moved from the original specifications.

11) Exhibitor personnel or display house may supervise on your behalf. Exhibitors who do not provide supervision (either company personnel or display house) agree to accept the charges for time, materials and equipment as determined by RES.

12) You are required to make arrangements prior to move-out for the outbound dismantling, packing and shipping of your hanging sign. RES cannot be held liable for damages or misplacement of sign(s) should outbound dismantling arrangements not be made. All pertinent information and arrangements must be given to the RES Service Center.

Use diagram below to represent the booth space. Indicate how far from each boundary you would like your sign. The ceiling structure and relation to support beams may require your sign to be moved from your specified location. On signs other than banners, include drawings or blueprints with detailed information so hanging anchor points can be determined. There will be additional labor charges if a hanging sign has to be moved once it has been suspended based on location indicated by the diagram provided by the exhibiting company or display house.
